

**Plate 1.** Looking south-west towards A' Mharconaich over dry and undifferentiated dwarf-shrub heath with Light-Moderate impacts, North Drumochter, 2014.

**Plate 2.** Looking north from Balsporran over dry and undifferentiated dwarf-shrub heath with Light-Moderate and Moderate impacts, North Drumochter, 2014.

**Plate 3.** Moderate and Heavy impacts on the slopes to the north-west of Meall Doire on dwarf-shrub heath and mosaics with grassland, Craiganour-sheep and deer, 2014.

**Plate 4.** Moderate-Heavy grazing and trampling impacts on mature heather on the slopes to the north-west of Meall Doire, Craiganour-sheep and deer, 2014.

**Plate 5.** Heavy grazing and trampling impacts on suppressed dwarf-shrub heath in mosaic with grassland, Meall Doire, Craiganour-sheep and deer, 2014.

**Plate 6.** Suppressed heather showing widespread grazing-induced growth forms characteristic of Heavy impact, Meall Doire, Craiganour-sheep and deer, 2014.

**Plate 7.** Heavy impact on steep slopes to the west of The Sow of Atholl, notably at interface of dwarf-shrub heath and grassland, Dalnaspidal, 2014.

**Plate 8.** Heavy impact on dwarf-shrub heath in mosaic with grassland, characterised by extensive areas of suppressed heather, north-west of Loch Garry, Dalnaspidal, 2014.

**Plate 9.** Light impacts on montane heath dominated by stands of wind-clipped and prostrate heather, Carn Dearg, Talla Bheith, 2014.

**Plate 10.** Heavy impacts on montane grass-sedge-moss heath, looking south from Mharconaich towards Sgairneach Mor, North Drumochter and Dalnaspidal, 2014. A'

**Plate 11.** Heavy grazing and trampling impacts on dwarf-shrub heath associated with winter-feeding, Talla Bheith, 2014.

**Plate 12.** Heavy grazing and trampling impacts on dwarf-shrub heath with widespread suppressed heather, Craiganour-sheep and deer winter-feeding area, 2014.

**Plate 13.** Heavy grazing impact on older heather associated with winter-feeding, Auchleeks, 2014.

**Plate 14.** Suppressed growth-form of heather in response to very heavy grazing, Auchleeks, 2014.

**Plate 15.** Light-Moderate and Moderate impacts on extensive areas of blanket bog and dwarf-shrub heath, Craiganour and Talla Bheith, 2014.

**Plate 16.** Heavy impacts of grazing and trampling on blanket bog and dwarf-shrub heath on the slopes to the north-west of Carn Fiachlach, Dunalastair, 2014.

**Plate 17.** Moderate to Heavy impacts on dwarf-shrub heath and grassland with bracken, on the slopes to the north of Kinloch Rannoch, Dunalastair, 2014.

**Plate 18.** Heavy impacts on grassland with blaeberry, steep corrie slopes, crags, scree and actively eroding areas, A' Mharconaich, North Drumochter, 2014.

**Plate 19.** Remnant birch woodland with Moderate and Heavy impacts on grassland with blaeberry, north-west facing slopes above Loch Ericht, Corrievarkie, 2014.

**Plate 20.** Abundant suppressed birch saplings, showing potential for natural regeneration of woodland on slopes above Loch Ericht, Corrievarkie, 2014.
